

Review Form 3

Journal Name:	International Research Journal of Oncology
Manuscript Number:	Ms_IRJO_127361
Title of the Manuscript:	The Role of Primary Care in Early Detection and Continuity of Care for Cancer Patients: A Review
Type of the Article	The Role of Primary Care in Early Detection and Continuity of Care for Cancer Patients: A Review Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript has its due importance not only as the scientific contribution for medical community but also from clinical point of view for the patient's healthcare delivery, early detection of the cancers, their appropriate referral to concerned expertise regarding its monitoring and ultimate better prognosis at large. We appreciate the effort and support it as review article and at the same time expect for and integrated, targeted approach for collaborative approach for further imperial research on it as well.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is fine, if Just add "Primary Healthcare Physician's Role" giving importance to Primary Healthcare Delivery role, in spite of just writing "Primary Health Care" it would be more appropriate	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The Abstract of the article is quite appropriate, hope it is in accordance to the instruction for the author from the journal point of view, it made objectively structured, that might be more appropriate as well.	
Is the manuscript scientifically, correct? Please write here.	Yes, its scientifically correct, just need to incorporate few more references from the economically developing countries, then economically developed world (which has already been catered) in between few references from WHO (World Health Organization) as well.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are less in quantity, should be more than 20 with at least 65 – 75% from within last five years, which need to be incorporated and there is sufficient room/gap exists in this regard in the article.	
Is the language/English quality of the article suitable for scholarly communications?	So far as the language/write up of the text is concerned, its quite appropriate	
<u>Optional/General</u> comments	<p>Generally speaking, it's a good article explaining the public health importance/implication, highlighting the pivotal role of the most important segment of Primary Healthcare Delivery in the overall healthcare system. Which has its importance role especially oncology keeping in view the consequences and high cost of the cancer treatment and sufferings of the patients and their families. We appreciate the effort along with recommendation for further collaborative, integrated, multicentre imperial research in this regard as well. There is need to focus towards developing countries with scarce resources explaining the importance of the primary healthcare professional GPs (General Practitioners) role in overall healthcare delivery. Thanks</p> <p>I recommend to accept it as such with appropriate changing as pointed out in the feedback, accordingly > 8-9 score</p>
