

**Review Form 3**

Journal Name:	<a href="#">Journal of Scientific Research and Reports</a>
Manuscript Number:	Ms_JSRR_127464
Title of the Manuscript:	<b>Biostimulant Applications to Combat Abiotic Stress in Soybean: Strategies for Improved Growth and Yield</b>
Type of the Article	<b>Review Article</b>

## Review Form 3

### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The topic of the paper is interesting from the point of view of sustainable soybean production and current extreme climate changes. Soybean is gaining more and more importance in the human diet, given that it has proteins that are similar in composition to proteins from animals, and today it is an irreplaceable food for vegans and vegetarians. Also, soybean has an exceptional agrotechnical cultivation importance, especially for crop rotation thanks to the symbiosis with microorganisms. Biostimulators (types and roles) are a new measure that is gaining more and more importance, however, a series of research is needed both at the molecular level and in agrotechnical and agroclimatic areas.	
Is the title of the article suitable? (If not please suggest an alternative title)	Overview of the use of biostimulants to combat abiotic stress in soybean production	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It is correct.	
Are subsections and structure of the manuscript appropriate?	It is correct.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript idea is good. However, a brief overview of abiotic influences on soybean is lacking. For example, what temperature limits and for how long (days) lead to drought. Or what are the optimal values of soil nutrients required for soybean production. In each chapter, it is necessary to provide a little more concrete examples of the application of biostimulants in soybean production, and what are the percentage values obtained in relation to the control. Tip - the application of various biostimulants can be tabulated, in which application, what was tested, the percentage of increase. Latin names must be marked - <i>Italic</i> . It is necessary to technically edit the manuscript according to the instructions. The source must be mentioned for the images. If the image was created by the author, state that the author is.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	It is necessary to completely revise the literature, given that one reference is cited several times, such as number 26 and 27. There are more.	
<b>Minor</b> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	It is correct.	
<b>Optional/General</b> comments	The manuscript should be accepted, but the manuscript needs to be supplemented.	

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

**Reviewer Details:**

Name:	<b>Marija Bajagić</b>
Department, University & Country	<b>University Bijeljina, Bosnia and Herzegovina</b>
