	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Extreme and unpredictable weather conditions have increasingly influenced disease incidence in various agricultural crops, particularly airborne diseases. Sugarcane, being highly sensitive to pests and diseases due to its high sugar content, requires special attention. As plant protectionists, we now rely heavily on weather forecasting to effectively manage these diseases. Brown spot disease, which is spread through the air, is particularly concerning due to its frequent potential to cause epidemics. Research in this area should be further encouraged to address these challenges
