

Review Form 3

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_127797
Title of the Manuscript:	Effect of maleic hydrazide foliar application on biochemical parameters and phytohormonal variations in groundnut (cv. Dh 86).
Type of the Article	Research article

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript offers valuable insights into the regulation of plant growth and stress responses. By exploring the impact of maleic hydrazide on key biochemical parameters and hormonal dynamics, the study enhances our understanding of how growth regulators influence groundnut physiology. Such knowledge is crucial for optimizing crop management practices, improving yield stability, and developing stress-resilient varieties. The findings can guide future research on sustainable agrochemical applications, contributing to advancements in groundnut production and overall agricultural productivity.	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Add the experimental location and reason for selecting the experiment in 1 or 2 lines.	
Is the manuscript scientifically, correct? Please write here.	In introduction, provide some information how dormancy affect the groundnut growth or metabolism. In materials and methods provide the location followed by the methods. Mention the statistical analysis used in this study. In result it would be good if you add subheadings for each component for easy understanding.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
