Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The paper is important as it deals with an important issue vis-à-vis women in Sudan. It highlights the fact of gender inequality in Sudan corroborated by data and statistics and also makes valuable recommendations aimed at ameliorating the status of women in Sudan. Women are becoming empowered with every passing day, however, in some Muslim societies (particularly in the Middle-East) women suffer due to societal and governmental apathy. Policies, that take into account the experiences of women across different societies, need to be framed and implemented in letter and spirit to help women to improve their conditions in patriarchal and conflict-ridden societies. As women in Jordan are doubly marginalized, their experiences and requirements are different from those of men in Jordan or women in other Western societies. The paper brings to fore the importance of a Transitional Justice system that takes into account women and their unique position in the society. The author can, however, take recourse to more recent feminist theories to validate the variance of experience of women even within Jordan. Discussion around the use of religion by women seems missing and may be incorporated.
