

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_127614
Title of the Manuscript:	Emerging Challenges in the Treatment of Lung Cancer During COVID-19 Infection
Type of Article :	Review Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I would like to suggest an additional enhancement to the paper. Including graphical representations such as charts, graphs, or comparative visuals for the results or a comparative study would significantly improve the clarity and impact of the findings.	Thank you for your valuable suggestion to improve the clarity and comprehension of this paper's significance. In response, I have incorporated Section 4, titled <i>Impact of COVID-19 on Lung Cancer Prognosis</i> . This section emphasizes the potential detrimental effects of COVID-19 on lung cancer prognosis, highlighting evidence of reduced progression-free survival (PFS) and poor functional status (PFSC) in affected patients. However, statistical significance could have been more consistently observed. Future research should prioritize more extensive cohort studies and mechanistic investigations to understand better the interaction between COVID-19 and lung cancer outcomes, especially concerning different treatment approaches.
