

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

Journal Name:	<a href="#">Journal of Engineering Research and Reports</a>
Manuscript Number:	Ms_JERR_127583
Title of the Manuscript:	Optimization of Kmeans, Kmedoids, and Kshape Using Intelligent Optimization Algorithms
Type of Article :	Research

### PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<ul style="list-style-type: none"><li>- Citations must be in ascending order starts with 1..but your citations starts with 6.</li><li>- Conclusion is very limited, extend to some more sentences</li><li>- Chapter 2 is very lengthy. Classify into existing work and proposed work</li><li>- Equations must be numbered.</li><li>-</li></ul>	<p>-We apologize for the oversight in the citation ordering. We have revised the manuscript to ensure that all citations are in ascending order, starting from [1], as per the required formatting.</p> <p>-Thank you for your feedback. We have extended the conclusion section to provide a more comprehensive summary of the findings, implications of the results, and suggestions for future work. The revised conclusion now includes additional insights and reflections on the broader impact of the research.</p> <p>-We appreciate your suggestion. In response, we have reorganized Chapter 2 into two distinct sections: one for reviewing existing work and another for presenting our proposed work. This restructuring improves clarity and makes the chapter more concise and focused.</p> <p>-We have carefully reviewed the manuscript and ensured that all equations are properly numbered. This change has been applied throughout the paper for consistency.</p>
