Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The studied subject is interesting and fits the objectives and scope of the AJFRN Journal. The above manuscript is significant to the scientific community as it provides valuable insights into the role of traditional cheese production in Chad, a country where dairy practices are often overlooked in global research. By examining both the socio-economic and technological aspects of cheese production through surveys, the study highlights how local methods contribute to cultural identity, rural livelihoods, and food security. Additionally, it offers a deeper understanding of the innovation and sustainability of traditional dairy practices, which can inform future agricultural policies and strategies in similar regions. This research also enriches the broader field of food science, particularly in understanding diverse traditional dairy production systems and their potential for innovation and market expansion in developing countries.
