

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|---|
| Journal Name: | Asian Journal of Economics, Business and Accounting |
| Manuscript Number: | Ms_AJEBA_125978 |
| Title of the Manuscript: | Zero Base Budgeting (ZBB) Technique in Panchayati Raj: A Fresh Approach |
| Type of the Article | Short communication |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|---|---|
| <p>It appears that the author(s) have taken the primary notes into account, for which thank you! I recommend to structure the development in a more appropriate way. The abstract lacks the identification of object, subject, thesis, goal and tasks, which would give the scope of the upcoming development in the exhibition, as well as the results achieved in it. In the introduction, each new quotation does not need to be separated into a separate paragraph. Congratulations on tabulating the differences between traditional budgeting and ZB budgeting. In order to acquire a scholarly appearance worthy of publication, please systematize the divided 10 points in the following classic structure: Introduction, Literature review, Methodology and Empirical results. To add specific data proving how Zero Base Budgeting is a suitable tool for budgetary control of Panchayati Raj in India. This will give concrete scientificity to the article. Please suggest concrete contributions of the research carried out in practical and theoretical aspects.</p> | |
