However, to further strengthen the review, consider incorporating more recent studies, especially those published within the last 5-10 years. This will ensure that the review reflects the latest research findings. Citation is non-consistent throughout the paper. <b>Recent references are not available. Add more references for 2021-2024</b>	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The language quality of the article appears to be suitable for scholarly communication. The writing is clear, concise, and well-structured. However, there are a few areas where minor improvements could be made: <ul style="list-style-type: none"> <li>• <b>Sentence Structure:</b> Some sentences could be rephrased for better clarity and conciseness.</li> <li>• <b>Word Choice:</b> Consider using more precise and academic vocabulary.</li> <li>• <b>Grammar and Punctuation:</b> Proofread carefully to ensure correct grammar and punctuation (<b>too many grammatical mistakes are present</b>)</li> </ul> Overall, the language quality is good, but professional editing and proofreading can further enhance the clarity and impact of the article.
