Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	<p>Highlight why this particular case report is novel?</p> <p>By the clinical pictures provided, the gingival health of the patient appears to be good. And as stated by the author the reason for recession appears to be faulty tooth brushing. Under these conditions, justify the use of CHX rinse and also CHX pre rinse.</p> <p>Mention horizontal incision given at the base of interdental papilla of the recipient teeth. That should have been the first incision.</p> <p>"The flap was coronally advanced and stabilized using sling and interrupted 6-0 silk sutures (Fig. 10). Pressure was applied with moistened gauze to achieve hemostasis and eliminate dead space". How will you attempt hemostasis any pressure after you suture. Kindly correct.</p> <p>Kindly keep the concussion very brief. Write only the outcomes of this patient.</p>
