PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	I think the reason for the study is good but I do not in particular like that this is not a case controlled study.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title accurately represents the case report	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive.	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The case report is highlighting the importance of hyaluronic acid and PRF for the correction of gingival recession but since it's a case report, it does not seem adequate with the results, to attribute the success rate to the material used. The authors have referenced such studies which have only used PRF or hyaluronic acid and achieved good results. The rationale behind using the combination is not justified in the absence of control groups.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes	
<u>Minor</u> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Language is suitably written	
<u>Optional/General</u> comments
