

Review Form 3

Journal Name:	International Journal of Medical and Pharmaceutical Case Reports
Manuscript Number:	Ms_IJMPCR_127962
Title of the Manuscript:	Amniotic Fluid Embolism Leading to Multi Organ Dysfunction: A Case Report
Type of the Article	Case report

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Amniotic fluid embolism (AFE) is an uncommon and fatal pregnancy condition. This case report emphasises the significance of early diagnosis and prompt treatment in managing AFE.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title is clear and descriptive.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It is concise and comprehensive. I suggest that the fact that AFE is rare and can be prevented with early detection and timely action should be emphasised.	
Is the manuscript scientifically, correct? Please write here.	yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are sufficient and recent	
Is the language/English quality of the article suitable for scholarly communications?	Some sentences are long and complex. Simplified and structured sentences will enhance clarity. Overall is well-written	
Optional/General comments	The manuscript is well-written but could benefit from a few improvements: <ol style="list-style-type: none"> 1. The abstract should highlight the clinical significance of AFE and its importance for improving clinical practice and future research. 2. In the introduction, adding context about global maternal mortality rates and why AFE is often underdiagnosed would further strengthen the case report. 3. The case presentation could be simplified avoiding long sentences for better clarity and flow. 4. The discussion should mention emerging treatments or strategies for improving maternal outcomes.
