

Review Form 3

Journal Name:	Asian Journal of Advanced Research and Reports
Manuscript Number:	Ms_AJARR_127615
Title of the Manuscript:	Association of neutrophil-lymphocyte ratio, platelet-lymphocyte ratio and ABO blood group in early pregnancy loss
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The study indirectly suggested the increase of Lymphocyte in pregnant women to reduce level of miscarriage. The study associating blood group to pregnancy outcome is an advantage to successful save delivery. The recommendation of low cost test of platelet count and NLR within the first trimester is novel and the inclusion in the medical survey (prenatal) is suggested.	
Is the title of the article suitable? (If not please suggest an alternative title)	The Title of the article is commendable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The Abstract is within the confinement of the study, therefore it is quite good	
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The Manuscript scientifically correct.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	More references to authenticate claims stated in the Manuscript is highly suggested, also, references on ABO citations are not recent and updating is suggested.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The English is highly commended for a scholarly communication.	
Optional/General comments	An overall medico-obstetric history is suggested in order to restrict the actual variables under study. No competing interest issues in the manuscript Plagiarism was not found
