

Review Form 3

Journal Name:	Asian Journal of Advanced Research and Reports
Manuscript Number:	Ms_AJARR_127615
Title of the Manuscript:	Association of neutrophil-lymphocyte ratio, platelet-lymphocyte ratio and ABO blood group in early pregnancy loss
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p><u>Optional/General</u> comments</p>	<p>The study is relevant and addresses an important aspect of maternal health. The methodology is clearly defined, and the data is well-presented.</p> <p>Here are few areas for improvement</p> <p>Title: The title accurately reflects the study's scope, ,it could be "The Role of Neutrophil-Lymphocyte Ratio, Platelet-Lymphocyte Ratio, and ABO Blood Groups in Early Pregnancy Loss".</p> <p>Abstract: The abstract provides a good summary but consider including a brief statement about the implications of increased NLR and platelet count in early pregnancy loss</p> <p>Introduction:</p> <p>The introduction provides a comprehensive background and highlights the gap in existing research.</p> <p>The introduction could benefit from better organization, combine related studies under a single paragraph</p> <p>Define terms ischemia-modified albumin Materials and Methods:</p> <p>The methodology is detailed, and ethical approval is explicitly stated.Provide a justification for the sample size.Clarify the exclusion criteria, particularly for the control group.</p> <p>Results:</p> <p>Strengths: Data is presented clearly in tables with appropriate statistical analysis ,why some parameters, such as eosinophils and monocytes, were included even though they did not show significant differences.Highlight key findings in the text</p> <p>Discussion:</p> <p>The discussion aligns with the findings and cites relevant literature for comparison. Address why PLR did not show significant differences in this study. The discussion on ABO blood group prevalence is descriptive</p> <p>Conclusion:</p> <p>The conclusion summarizes the main findings effectively.</p> <p>State the clinical implications of the findings ,Acknowledge the study's limitations References:</p> <p>Strengths: Refernces are relevant and up-to-date.</p> <p>Some key studies on NLR and PLR in pregnancy complications can be added Figures and Tables:</p> <p>Ensure that all tables and figures are self-explanatory with detailed captions.</p> <p>As a reviewer I do not have any competing interests Study do not have any ethical issues...</p>
