

Review Form 3

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_127206
Title of the Manuscript:	Andrological Potential of Aqueous Leaf Extract of Stevia rebaudiana in Male Wistar Rats
Type of the Article	Experimental research

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	A major reproductive health issue in a large population is infertility. Sperm quality, quantity, and shape are all declining, endangering male reproductive health. By analysing the andrological result, this study showed how aqueous stevia extract might increase the reproductive potential of male Wistar rats. This gave the ethnomedical usage of S. rebaudiana leaf scientific validation.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Methodology, Result, and Conclusion are examples of titles that shouldn't be included in an abstract. should be thorough.	
Are subsections and structure of the manuscript appropriate?	There should be a literature review.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The purpose of this is to confirm, via first-hand evidence, the safety and effectiveness of clinical trials on the long-term, high-dose usage of leaf extract in both males and females. To make sure the leaf extract has no effect on transgenerational reproductive health, the effects of testosterone enanthate on male Wistar rats' reproductive health were also examined.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes	
Minor REVISION comments	yes	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	Provide a summary of the study's general findings, focussing on whether Stevia rebaudiana's aqueous leaf extract has any protective benefits on male reproductive health or exhibits potential as an androgenic agent. Emphasise the possibilities for future uses while warning that further study is required to verify safety and effectiveness before clinical usage may be contemplated.
