Manuscript Number:	Ms_JCTI_127988
Title of the Manuscript:	Molecular expression patterns of ER, PR, Her2/neu, and Ki67 in Sudanese breast cancer patients.
Type of the Article	

#### PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript is a very good work especially given the depth of which the researchers try to bring to light one of the most deadly diseases that is killing women in Sub-saharan Africa. The scientific community will benefit from the manuscript because Molecular breast cancer research on African patients is less than 3% of the global average.	
Is the title of the article suitable? (If not please suggest an alternative title)	In my view he should recast the title to reflect the work.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The article is not comprehensive; it's more like a summary than a research article.	
Is the manuscript scientifically, correct? Please write here.	It has all the components to be helpful to the scientific community.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		
Is the language/English quality of the article suitable for scholarly communications?	The language is straight forward, not ambiguous.	
<b>Optional/General</b> comments	<b>I will suggest the authors rewrite the article because it's something the scientific community will benefit from not just this journal or the Sudanese people.</b>	

#### PART 2:
