

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_112188
Title of the Manuscript:	Influence of nitrogen levels and zinc application on Morphological and Physiological attributes of rice varieties
Type of the Article	Research

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. Nutrient research is important for plant growth and production, especially rice which is consumed by almost all of the world's population. Research on micro nutrients is important, especially Zn, which can increase plant weight and the nutritional value of consumed rice. Zn is beneficial for increasing intelligence, this research will add references to the importance of the availability of Zn in agricultural land and plants. 2. The title is appropriate to the content and parameters of the research 3. Because this research is about plant physiology, it is important to include the specific location of the research, for example the altitude 4. There are still things lacking in the text structure, such as conclusions and suggestions not written in this text 5. This script is scientifically correct 6. Additional references specifically on the role of Zn in plant physiology are needed if possible. The Effect Of Zn-Enriched Biochar On Peroxide Enzyme Activity, Auxin Content, Chlorophyll Count And Zn Of Rice In Different Flooding Systems Cell Biotechnology And Molecular Biology 19 (5-6), 196–204 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	Clear language can be understood	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
