

Review Form 1.7

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_108706
Title of the Manuscript:	Prevalence of mycoplasma and its neisseria in asymptomatic women and study of their sensitivity to the aqueous extracts of tamarindus indica and syzygium aromaticum
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, the topic is important for the scientific community.</p> <p>2. It is ambiguous. The authors want to see the prevalence (this may already be known in the area/ state/ country). As the study is not having targeted objectives, so a fresh title can not be suggested.</p> <p>3. NO</p> <p>4. NO</p> <p>5. No. Having many grammatical errors. No clear-cut messaging texts. Botanical and zoological names are NON-ITALIC written. Which part of the plant's authors have used for extraction? Which stage of plants have been used? Why the cocktails of extracts have been used? The reason of the RATIO chosen? What is the meaning of PHYSIOLOGICAL WATER (As a reviewer I have heard this word first time. It should be Normal Saline Solution i.e. NSS), How the authors have confirmed about the mycoplasma spp.? In well diffusion test in M-H agar, <i>Mycoplasmas/ Ureaplasmas</i> cannot grow as they are fastidious organisms and needs serum supplemented medium for its growth. The control ANTIBIOTICS are to be placed simultaneously in the media along with the EXTRACTS of plants used.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>
