<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Somewhat. Multiple spelling mistakes are present</p>	
<p>Optional/General comments</p>	<p>The tables included are vague and do not show any correlation. Table 2 is unnecessary. Severity of disease has not been defined at all. No mention on what co-existing complications are. No tests of significance have been done. No correlation has been done regarding treatment duration and QoL. Attached figures are irrelevant. A tabular format of comparison of previous studies and existing study would be more useful</p>
