<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. I strongly believe that this is a good start to understand the general overview of the students' perception of IPE in Sri Lanka</p> <p>2. Yes</p> <p>3. Yes</p> <p>4. I would suggest to include a section called "Aim of the study" because in my opinion it is not clearly stated</p> <p>5. Yes</p> <p>6. yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes but I would check for repetition of the same word like "important" in the discussion section</p>	
<p>Optional/General comments</p>	<p>I think the introduction is too long: the paper is mostly for experts of the sector so I would try to make it shorter. I think this will make the text more fluent.</p> <p>I am confused of what they want to show with the Kruskal Wallis test: I think that in this case the test shows whether there is a significant different in opinion (related to a specific skill or teaching method or situation) between different groups of health care students. It's not clear</p> <p>I included more comments in the manuscript, I hope this is fine. If it's not please let me know</p>
