

Editor's Comment:

This paper entitled "The Coffee Shop Functions As Facilities, Pattern Of Interaction And Social Intervention In Jeneponto Regency, South Sulawesi" is well structured with its traditional structure (Abstract, Introduction Literature Review, Research Methodology instead of Method, a Conclusion and some References). I will advise to implement some Facts and Findings, with a Conclusion and Recommendations adding a plus value to this qualitative descriptive study. The references should be in alphabetical order for ease of referencing otherwise I recommend it for publication in your well esteemed journal.
