

Review Form 1.7

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_112262
Title of the Manuscript:	Assessment of Clinico-physiological and Haemato-biochemical Profiles in Hampshire Crossed Pigs
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes, this manuscript provides a good understanding of age-associated physiological, haematological, and biochemical variations in pigs, and also gives important information for proper pig health management practices.</p> <p>Yes</p> <p>Yes</p> <p>Yes, but they need to be numbered.</p> <p>Yes</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>Materials and Methods</p> <ol style="list-style-type: none"> The introduction, materials and methods with their subsection, and results and discussions should be numbered. The author didn't indicate how long it took to collect the results of Haematological and biochemical parameters after collecting the blood samples. The author stated that the results obtained from the Haematological and biochemical parameters were consistent with the findings of other published work but failed to mention their findings. The author is encouraged to include the results of the findings that align with the research, to make this research more comprehensible. The author is encouraged to include standard or reference Haematological and biochemical parameters for healthy and sick animals, to compare and contrast this research findings
