

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_104712
Title of the Manuscript:	Effect of high temperature on growth and yield attributes of Indian mustard genotypes due to late sown
Type of the Article	Review Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- The manuscript is important for the scientific community because it adds scientific information on the properties of mustard species under adverse climatic conditions.</p> <p>2- Yes, the title of the article is suitable.</p> <p>3- Yes, the abstract of the article comprehensive.</p> <p>4- The subsections and structure of the manuscript are appropriate. but, I would like to put the following chat figures directly to see.</p> <p>5- Yes, I think the manuscript is scientifically correct.</p> <p>6- Yes, the references are sufficient and recent. but, you can add references from other researchers in African and American countries.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1- Yes, language/English quality of the article is suitable for scholarly communications</p>	
<p>Optional/General comments</p>	<p>For the study area, I want to configure it as a map, and clearly show the type of georeferencing of the study area. at the same time, it is necessary to represent the differences between the species by the component analysis in addition to adding the main numerical results in conclusion</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
