

Review Form 1.7

Journal Name:	Asian Journal of Education and Social Studies
Manuscript Number:	Ms_AJESS_113131
Title of the Manuscript:	Climate Change and Women Health Vulnerabilities: Mitigation and Response
Type of the Article	Minireview Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, the manuscript is important for the scientific community as it comprehensively addresses the link between climate change and women's health vulnerability, providing practical proposals and emphasizing the need for gender sensitivity in climate policies.</p> <p>2. Yes, the title "Climate Change and Women Health Vulnerabilities: Mitigation and Response" is suitable as it accurately reflects the focus on the impact of climate change on women's health and emphasizes the need for mitigation and response strategies.</p> <p>3. Yes, the abstract of the article is comprehensive. It effectively summarizes the key points, including the impact of climate change on women's health, the existing vulnerabilities, and the importance of gender-sensitive mitigation and response strategies.</p> <p>4. Yes, the subsections and overall structure of the manuscript are appropriate. The paper is well-organized, with clear subsections such as Introduction, Women's vulnerability, Mitigation and Response against vulnerabilities, and Conclusion. This structure enhances the readability and understanding of the content.</p> <p>5. Yes, based on the information provided, the manuscript appears to be scientifically correct. It references relevant studies, presents logical arguments, and aligns with established knowledge on the relationship between climate change and women's health vulnerabilities.</p> <p>7. The references in the manuscript seem appropriate, and they include a mix of sources. However, without specific information on the actual references cited in the manuscript, I cannot provide a detailed assessment of their sufficiency or recency. Generally, it's recommended to include a balance of recent and authoritative sources to strengthen the scientific credibility of the manuscript. If additional references are needed, it would depend on the specific topics discussed in the paper. For instance, recent reports from reputable organizations, updated climate change assessments, or studies focusing on gender-sensitive climate policies could be considered.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1. Yes, the language and English quality of the article are suitable for scholarly communications. The text is well-written, clear, and conveys complex scientific information effectively. The use of terminology and structure is appropriate for scholarly communication.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
