

Review Form 1.7

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_112566
Title of the Manuscript:	The Influence of the Demographic Factors of Nigerian Dental Practitioners on their Perception of Accelerated Orthodontics
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Partially</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p><u>Optional/General</u> comments</p>	<p>Provided above this table</p> <p>General comments</p> <p>1. It tries to identify the influence of age, gender and work experience on Perception of Accelerated Orthodontics and they applied ANOVA and independent t-test statistics.</p> <p>However, we shouldn't forget that independent t-test can't be used for gender hence its categorical variable and one of the basic assumptions of independent t-test is your dependent variable should be measured on a continuous scale.</p> <p>2. The samples size is inadequate for statistical analysis. If the source populations are 4000-4500 its good to have at least 250 samples and carry out a regression analysis in order to answer the proposed research question.</p> <p>3. The references are cited manually. It was better to be automatically cited.</p> <p>4. The introductory section is full of fragmented statements that doesn't have coherence and consistency.</p> <p>5. The method and materials section lacks important components like Ethical consideration,</p>	

Review Form 1.7

	eligibility criteria, variables definition,...	
	6. The result section lacks textual description and measurement of an important outcome variable i.e. respondents perception towards Accelerated Orthodontics.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
