

## Review Form 1.7

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_112337
Title of the Manuscript:	Beta-lactam resistance and phenotypic detection of extended-spectrum beta-lactamase in Enterobacteriaceae isolated from community-acquired urinary tract infections
Type of the Article	

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Manuscript is very important to scientific community as urinary tract infections are very common irrespective of sexes and age. Many pathogens have shown antibiotic resistance also. So, it is very important to understand base cause and its treatment</p> <p>2. The Title is seeming to be confusing and not able to define well the work concern. The title should be well explanatory with suitable words and sentence. This needs to be reframed</p> <p>3. Abstract is ok but Objective first sentence is not appropriate. this needs to be rewritten.</p> <p>4. Yes</p> <p>5. Yes It is good</p> <p>6. Numbers of references are ok but latest good journals references are very less that needs to be incorporated</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Language for scientific communication is ok	
<p><b>Optional/General</b> comments</p>	Overall, the approach for work is very applicable for bacterial antimicrobial profile study. With above said minor corrections the paper could be accepted	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><u>(If yes, Kindly please write down the ethical issues here in details)</u></p>
