

Editor's Comment:

The reviewed manuscript (2024/ARRB/111899) entitled, "Response of mustard (*Brassica juncea* L.) to different bio-regulators under varying fertility levels" for a final decision. I am very glad to read this innovative piece of research work and found that the authors have done wonderful jobs in revising their manuscript based on the scholastic comments/suggestions raised by the reviewers as well as improving the manuscript in a good manner. However, there are still some minor mistakes/errors in wordings and languages as well as formatting/arranging of tables, citations and references, which need to be corrected/revised, and the suggested references by the reviewer (Destaw Mullualem Atinafu) should be added before final printing. Therefore, I recommend the manuscript for publication in Annual Research & Review in Biology with minor revisions. Hope, you will agree with my decision and also will take needful actions towards its acceptance and publication.
