

**Editor's Comment:**

The manuscript has been revised according to reviewers' comments. However, I suggest that there are still revisions minor before the acceptance for the publication in the journal.

Comments:

1. Almost all findings obtained in this study are similar with previous findings. Novel findings should be more emphasized.
2. There are many careless mistakes in spelling. Two words were combined to one word in the text and independent variabe in Table 1. For example, independent variable "Farmingexperience" is divided to "Farming experience".

Please make spell check (See attached file).
