

**Editor's Comment:**

Interesting research of obvious practical concern, soundly conducted

Part of relevant suggestions of Reviewers have been taken into account; however, there remains a need to carefully review the entire text and make corrections to a series of points arisen by Reviewers.

Just for examples:

\* the reference Edwards and Burrows, 1988 is still lacking in References' list in the revised version of the manuscript,

\* the same holds true for Jackson 1973 at line 126,

\*also for Subbhia& Asija (1956) etc....

\* at the end of Introduction, western U.P. has not received, as required, explicit meaning; I understand that Utar Pradesh is an evidence for the Authors, but all readers may be less familiar

\* etc ....

After this general review to answer those Reviewers' suggestions remained unanswered, this good manuscript will be OK to be published in IJECC.
