

Editor's Comment:

Editorial decision on the peer-reviewed manuscript entitled "Quality of life in Caregivers of Children with Cerebral Palsy in Rivers State, Nigeria" (Manuscript No.: 2024/INDJ/113374) submitted to the International Neuropsychiatric Disease Journal.

Having thoroughly examined both the initial and revised manuscripts alongside the reviewers' feedback, I've observed the pertinence and value of the reviewers' suggestions in enhancing the manuscript's quality. It's evident that the authors have adeptly incorporated the reviewers' feedback, resulting in a more coherent, comprehensive, and journal-appropriate manuscript.

With the exception of minor issues related to formatting, verifying references, and linguistic polishing, the manuscript is comprehensive. In my view, it delves into a pertinent subject matter and holds potential for substantial contributions to its corresponding field of study.

I recommend the acceptance of the manuscript.
