

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_112175
Title of the Manuscript:	Effect of PGR and cow urine on pineapple propagation through crown in soilless culture under protected condition
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>This manuscript does not examine new material. It seems that the title of the article needs to be edited.</p> <p>The abstract of the article needs to be revised. In fact, it should present the general results of the article in an attractive and concise manner to encourage the audience to read the article, The number of examined samples is very small and the need for a higher statistical population. Obviously, the general results will undergo major changes against the examination of more samples. This will ensure the consistency and durability of the results.</p> <p>The subsections and structure of the manuscript are appropriate. Most of the references and sources used are old, and this has reduced the freshness of the article.</p> <p>1-Antunes, T.F.S., Rodrigues, S.P. and Fernandes,P.M.B. 2020. MicroRNAs are predicted to control the ubiquitin/proteasome system in Carica papaya plants infected by the PapayaMeleira Virus complex. In: Multidiscipl. Dig.Publish. Inst. Proc. 50: 146 p. https://doi.org/10.3390/proceedings2020050146.</p> <p>2- (PDF) Effect of nitrogen forms on physiological and biochemical constituents of lettuce grown in soilless conditions during different seasons.</p> <p>3-Afzal, N.Z., Huguet-Tapia, J.C. and Ali, G.S.2019. Transcriptome profile of Carrizo citrangeroots in response to Phytophthora parasitica infection. J. Plant Interac (5) (PDF) Effect of nitrogen forms on physiological and biochemical constituents of lettuce grown in soilless conditions during different seasons.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is understandable.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
