	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes. The syndrome can be presented any physician so proper knowledge can provide proper treatment and even it may be life saving for the patients.</p> <p>2. Yes.</p> <p>3. Yes.</p> <p>4. Yes</p> <p>5. Yes</p> <p>6. References are not recent. There are some examples of recent articles with some updates</p> <p>a. Barro, M.; Ouedraogo, Y.S.; Nacro, F.S.; Sanogo, B.; Kombasséré, S.O.; Ouermi, A.S.; Tamboura, H.; Cessouma, R.K.; Nacro, B. Apert Syndrome: Diagnostic and Management Problems in a Resource-Limited Country. <i>Pediatr. Rep.</i> 2019, 11, 8224. https://doi.org/10.4081/pr.2019.8224</p> <p>b. https://doi.org/10.1016/j.jobcr.2022.04.002</p> <p>7. The photo and photo description with case should be proper.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes.	
<p>Optional/General comments</p>	<p>1. Introduction- Not sufficient. Need more introductory information those are described in discussion.</p> <p>2. The case reports are incomplete. No family history, parents' age was mentioned. Patients' management were not described. The 1st case was a neonate, so the measurement fontanelle especially anterior should be described.</p> <p>3. Discussion-</p> <p>a). can be reached with authors' case comparison to others in literature in presentation and management and providing some recent updates.</p> <p>b) AS is not mentioned as short form of Apert Syndrome, it have to be mentioned.</p> <p>c) Orbit is written as orbita for several time, it needs correction.</p> <p>4. Pictures – there were no proper picture legends. The full picture of the baby should hide the identity especially genital organ as it was not related to the syndrome.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
