(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscript is useful for the scientific community, especially in order to understand how we acted during the covid period and how it influenced pregnancies and neonatal outcomes. I would suggest reorganizing the title, it is not so clear. I'd better say "Impact of clinical severity of COVID-19 during different trimesters of pregnancy on maternal or fetal/neonatal complications: a prospective cohort study".</p> <p>The abstract must be revised and well organized.</p> <p>The structure of the manuscript is appropriate.</p> <p>The scientific rationale is absolutely fine.</p> <p>For references I would suggest citing one big recent work on covid and pregnancy outcome: Libretti A, Troia L, Cappello AM, Casarotti C, D'Amato AT, Dallarda G, Ghio M, Nicosia A, Ricci D, Savasta F, Sonzini M, Villa D, De Pedrini A, Surico D, Remorgida V.
