

Editor's Comment:

The author are treated with all the reviewer comments in good manner but still there are some things need to be arranged by the author so I suggest to accepted this manuscript (Manuscript number: 2024/AJPCB/112626) for publication in Asian Journal of Pregnancy and Childbirth after taking the followings in considerations.

1. Some written keywords such as (UTH-Bogodogo, Ouagadougou) are not suitable and need to be changed.
2. The introduction is to short and concentrated so that its need to some additives especially literature reviews.
3. Some references (2, 3, 22) need some amendments.
4. The Numbering and bullets presented in the result section written as thesis and dissertation rather than article paper so I suggest rearranging the numbering and bullets in result section.
