No, it was too short and had too little information.</p> <p>4. Yes.</p> <p>5. Yes.</p> <p>6. Yes.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>Dear author</p> <p>I highly appreciate your hard work on this manuscript, but I have a few remarks:</p> <ol style="list-style-type: none"> Generally, an abstract is a summary of the manuscript. If written in structured abstract form, it consists of an introduction, case presentation, discussion, and conclusion. Besides, an abstract can be written in 250-300 words, it would be so much better if the author(s) maximized those words count in writing the summary to make it more comprehensive. It is supposed to have no citation in the abstract section. Provide 3-5 keywords according to MeSH Terms. Please explain more why this case report is interesting and important to publish. Write the aim of the study at the end of the introduction. Evaluation outcomes during follow-up examinations need to be written in the case presentation. Enrich your discussion by adding more research from other authors. For journal references, use the last 5-10 years of publication. <p>Hope it helps improve your manuscript's quality</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
