

Review Form 1.7

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_111877
Title of the Manuscript:	Resolution of the standard telegraph equation by the Laplace-Adomian method
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>yes</p> <p>yes yes yes yes</p> <p>need correction</p> <p>need to be updated</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Need improvement</p>	
<p>Optional/General comments</p>	<p>Include graphical presentation comparison with other method. Updated references as LADM has largely used like: Analytical Approximation of Brusselator Model via LADM." <i>Mathematical Problems in Engineering</i> 2022 (2022). A hybrid method for solving fuzzy Volterra integral equations of separable type kernels." <i>Journal of King Saud University-Science</i> 33.1 (2021): 101246. Numerical analysis of Lane Emden–Fowler equations." <i>Journal of Taibah University for Science</i> 12.2 (2018): 180-185. Computational analysis of the third order dispersive fractional PDE under exponential-decay and Mittag-Leffler type kernels." <i>Numerical Methods for Partial Differential Equations</i> 39.6 (2023): 4533-4548.</p>
