The Main part of Manuscript consists of only one theorem which is proved for the distance structure of super metric not also such type of results are already exist in ordinary metric, partial and m-metric structures so only a minor change in distance structure does not leave a significant impact on scientific community.</p> <p>2. It seems ok but if author use "fixed point result for interpolative Kannan type contraction in the framework of super metric spaces" then it more clarify the understanding of the manuscript.</p> <p>3. As manuscript contains only one theorem so according to that abstract is ok.</p> <p>4. yes</p> <p>5. It needs some more improvements to clarify the idea.</p> <p>6. yes</p>
