If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p><b>Yes it is important as it involves a study of how different types of blood groups impact on suffering with anaemia as well as focusing on nutritional and socioeconomic backgrounds.</b></p> <p><b>Yes, it is suitable. But I'm suggesting one Hematological Insight: An Epidemiological Study on Prevalence of Anemia in Diverse Blood Groups within the Population of Hyderabad Sindh</b></p> <p><b>Yes</b></p> <p><b>Yes</b></p> <p><b>Yes, it is scientifically correct</b></p> <p><b>Yes</b></p> <p><b>Grammar of the overall manuscript can be improvised.</b></p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>It is suitable but there are few corrections need to be made</p>	
<p><b>Optional/General</b> comments</p>	<p>Background: In 2<sup>nd</sup> line replace are with is, 3<sup>rd</sup> line it should be indices not dices            Materials and methods: Remove Sindh from 5<sup>th</sup> line, last second line it is prism not rism.            Introduction: 1<sup>st</sup> para 5<sup>th</sup> line replace divided in with divided into, 6<sup>th</sup> line it should be female not females, 7<sup>th</sup> line improve grammar, 12<sup>th</sup> line it should be 6 million people not peoples, 2<sup>nd</sup> para 2<sup>nd</sup> line add in beside decrease, 5<sup>th</sup> para remove while those and replace it with compared to.            Methodology: number of patients involved in control group and study group is different in the abstract and the manuscript should maintain clarity regarding number of patients involved in the study.            Results: the explanation related to table 2 should be prompt and concise. You have mentioned that odds ratio has been calculated kindly mention the value so it would be helpful for the readers.            Discussion: 3<sup>rd</sup> line replace a with the.            One question out of curiosity I'm asking, what is the probability and frequency of people with O &amp; B blood groups suffering with anemia as per the study you have conducted. Not just based on existing literature but based on the practical research you have performed.            Kindly include acknowledgement and conflicts of interest.            I really appreciate the quality maintained it's a beautiful research, need of the hour study as many people are anemic now-a-days, well executed methodology.            I recommend to accept this research paper.</p>
