If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p> | <p>The manuscript is very important since it explore the knowledge among parents, whether they know what contribute to under nutrition among under five children. The findings will assist to develop tailor made interventions to mitigate the problem. Areas with similar setting can copy similar intervention to respond to their needs.</p> <p><b>I suggest the title to be "Exploring Maternal Perspectives on Contributors to Undernutrition Among Under-Five Children in Chosen Primary Healthcare Centres within Abeokuta South Local Government Area, name of the country. Otherwise even myself I Don't know which country is this study has been conducted"</b></p> <p>The abstract is very long and not easy to understand, should be comprehensive.</p> <p>Sub section and structure is correct</p> <p>The manuscript is scientifically correct since it followed standards of scientific methodology, reporting, and communication.</p> <p>I think the aim of the reference is to balance between providing enough references to support the argument and not to overwhelming the reader with an excessive number and focus on the most relevant and recent sources that directly contribute to study. <b>Being a case for this study the references are sufficient and recent</b></p> <p><b>Conclusion part can be reversed to reflect aim of the study and its findings. Abstract should be re-written</b></p> |   |
| <p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>   | YES   |   |
| <p><b>Optional/General</b> comments</p>  | GOOD  |   |
