

Review Form 1.7

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_113542
Title of the Manuscript:	Exploring Biochemical and Hematological Variations in Malaria Cases: A Retrospective Analysis at a Health Center
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. The study may tell the scientific community about the present prevalence and hematological profiles of malaria in the studied area.</p> <p>I suggest Prevalence and Hematological profiles of Malaria Cases at a local Health Center of Mumbai.</p> <p>it is not short, concise and compressive .The objective, method and result should be written in the past form.</p> <p>Yes.</p> <p>Its grammar, English language writing errors. It has also scientific error especially, its referencing style (it is mixed) and genus and species of plasmodium species must be italicized. The manuscript is not aim oriented. Example, introduction part paragraph two is not part of the objective and should be deleted.</p> <p>The references are relatively recent and sufficient but the author used two types of referencing styles per manuscript. It should be improved based on journal recommendations.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>The manuscript's English language communication needs improvements. It has grammatical and subjective mistakes. It has also clarity of writing.</p>	
<p>Optional/General comments</p>	<p>The manuscript Grammar and writing should be corrected. It also targeted to the aim of the study. The title should be modified and targeted to malaria prevalence and its hematological profiles in the study area. Further more, the genus and the species of Plasmodium must be italicized. The discussion part should be well discussed. The reference style must be corrected based on the journal referencing style. Figures also are well readable and need modification. Table 1, 2 and 3 should be deleted and rewrite text if they are needed.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
