Title of the Manuscript:	DETERMINANTS OF WOMEN IN POST- PRODUCTION AGRI-VALUE CHAIN ACTIVITIES PARTICIPATION IN GROUPS IN NJORO AND MOLO SUB-COUNTIES IN NAKURU COUNTY, KENYA
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript addresses a significant topic in agricultural economics and sociology, particularly focusing on women's participation in agri-value chains. This is a pertinent area of research with practical implications.</p> <p>The title accurately reflects the content of the paper and is appropriate for the subject matter.</p> <p>The abstract gives a clear overview of the study, its methods, findings, and implications.</p> <p>The structure, including subsections, is logical and facilitates understanding of the study.</p> <p>The methodology and data analysis appear to be scientifically sound.</p> <p>The manuscript includes relevant and recent references, providing a good context for the study.</p> <p>In reviewing the manuscript, I have identified some areas for improvement:</p> <ol style="list-style-type: none"> 1. Data Analysis: While the data analysis is generally sound, a more detailed explanation of the statistical methods used could enhance the manuscript's scientific rigour. 2. Discussion of Results: The discussion section could benefit from a deeper analysis, connecting the findings more explicitly to broader trends in the literature. 3. Methodology Details: More specifics about the sampling methods and participants would strengthen the validity of the research. 4. Case Studies or Examples: Incorporating specific case studies or examples might provide clearer illustrations of the concepts and findings. 5. Graphics and Tables: Enhancing the quality and clarity of graphics and tables would improve the presentation of data. 6. Literature Review: Expanding the literature review to include a wider range of sources could position the study more firmly within the existing body of research. 7. Practical Implications: Elaborating on the practical implications of the findings would make the paper more valuable to practitioners in the field. 8. Conclusion: The conclusion could be more impactful by succinctly summarizing the key findings and suggesting areas for future research. 	
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>The language and presentation are generally suitable for scholarly communication, but minor language editing might be needed for clarity.</p>	
<p><u>Optional/General</u> comments</p>
