

Editor's Comment:

On studying the Review-Article, I access it as an original bibliometric research article and of utmost importance.

1. The title of the study is relevant.
2. Abstract is meaningful.
3. Keywords are related.
4. The introduction is sufficient.
5. Research Methodology is suitable.
6. Analysis of data is appropriate.
7. The conclusion is comprehensive.
8. References are very less as per the secondary database study.

I recommend the review article entitled "Exploring the Landscape of Entrepreneurial Behavior Among Farmers: A Bibliometric Analysis Using the Dimension Research Database" for publication.
