

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_113530
Title of the Manuscript:	MODELING EVAPOTRANSPIRATION USING SWAT FOR THE MIDDLE NARMADA CATCHMENT
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	YES Suitable YES YES YES All of references should be in International Journal of Environment and Climate Change format.	1. I agree with reviewer. 2. I agree with reviewer, title is suitable for this article. 3. I agree with reviewer. 4. I agree with reviewer everything is appropriate. 5. I agree with reviewer article is scientifically correct. 6. As per suggestion references format is changed as per format of IJECC. Please see the revised manuscript.
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?		Yes
Optional/General comments	<p>The manuscript described on demonstrates water scarcity is a pressing global concern that affects various regions, ecosystems, and populations. This study delves into the hydrological dynamics of a region by analyzing monthly and annual datasets that encompass the intricate interplay among rainfall, potential evapotranspiration (PET), and actual evapotranspiration (ET) using SWAT model for Gadawara watershed of middle Narmada catchment.</p> <p>The subject of interest of the submitted manuscript is worthy of attention and fits to the scope of the International Journal of Environment and Climate Change. The manuscript is very original research and experimental study. The scientific quality and originality of this manuscript is quite good. Statistical method is good qualified in the manuscript. The manuscript quality of written English is at acceptable level.</p> <p>It was clearly observed that in-depth discussion has provided adequate ground for valid conclusion. The bottom-line is that the article has the potential to be published in the International Journal of Environment and Climate Change.</p> <p>All of references should be in the International Journal of Environment and Climate Change format.</p> <p>In my opinion, the article is acceptable for publication in the International Journal of Environment and Climate Change.</p>	As per suggestion references format is changed as per format of IJECC. Please see the revised manuscript.
