

Editor's Comment:

I carefully analyzed the final paper and the reviewers' recommendations. The reviewers made important recommendations for improving the paper. Unfortunately, the authors did not make these improvements. For example, a referee requests: *The author must include at least 5 supplementary references, with an emphasis on utilizing more recent research, specifically from the year 2020 and above.*

From the analysis of the paper, it appears that the most recent reference is from 2018.

Consequently, the paper is not recommended for publication.
