

Review Form 1.7

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_110330
Title of the Manuscript:	Immunomodulating potential of Ekebergia capensis in murine Schistosoma mansoni juvenile and adult infection
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The concept of the manuscript is important for Scientific Community and it addresses a possible alternative Chemotherapy for Schistosomiasis Eradication.</p> <p>The title is suitable</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>There are information requiring reference citation in the manuscript. Appropriate comment had been provided in the main manuscript.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes. Some highlighted errors should be corrected though.</p>	
<p>Optional/General comments</p>	<p>The Author should justify the possible need for an alternative medication other than PZQ. The Author stated the topic of the manuscript to be "Immunomodulating potential of <i>Ekebergia capensis</i> in murine <i>Schistosoma mansoni</i> juvenile and adult infection". There was no indication to the immunomodulating properties of PZQ and there is a need to give a conclusive recommendation about the comparative analysis of the immunomodulating properties of PZQ and extracts from <i>Ekebergia capensis</i>.</p> <p>Also, the Author should seek to answer the following from the research: Does the result of the research indicate that a better immunologic response would be generated against Schistosomiasis using PZQ, extracts from <i>Ekebergia capensis</i> or a combination of both?</p>
