If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes, It's important because dengue fever can cause severe pain and weakness and has the potential to spread throughout a population. Chemical treatments are generally used to treat dengue fever, but they often cause side effects. They not only prove ineffective but may also lead to gastritis and/or bleeding. So that giving herbal medicines can be considered through research or studies because apart from being effective they can also minimize side effects.</p> <p>2. Yes, The title is suitable for the manuscript</p> <p>3. Yes, the abstract has summarized all the components in the manuscript</p> <p>4. No, the introductory section should be the main heading and not divided into subheadings below it. Taxonomic Hierarchy and Other Names, Geographical distribution, and Botanical description and cultivation should be made into their own headings and not be part of the introduction.</p> <p>To make tables, it is emphasized to use an open table, and to write the order in the manuscript, it is better to use numbers or letters rather than using symbols.</p> <p>The spelling of the name papaya for Indonesia is "Pepaya"</p> <p>5.
