There are many other ratios that are of concern, namely CAR, Loan to asset Ratio and NPL</p> <p>Literature Review It needs to be explained in theory whether this is new and important knowledge to be renewed for banking science</p> <p>Methodology The methodology used is very weak, especially the population used. The number of respondents is 30 people, which will give biased results in the class assumption test. Data analysis is very weak. The data used is panel data so validation must be used in layers starting from validity testing, reliability to model estimation</p> <p>Reference There is very little article support so the author cannot determine the Methodology well</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	Enough
