

Editor's Comment:

The paper is accepted with minor changes.

- This sentence may be changed

"The study reveals that statistical significance ($p=0.04$) was seen from the mode of payment delivery and caesarean section out of pocket money was more"

To be "The study revealed that the statistical significance ($p=0.04$) for the method of payment, childbirth, and caesarean section from pocket money was more."

Please add "." to the end of this sentence: "The study also indicates that majority paid out of pocket and a few respondents were insured"

This abbreviation for Caesarean section is not appearing in the same form throughout the paper. It appears as C/S & CS. Please, write it in the same form.
