<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, it gives information on which formulation is best to be used for field application</p> <p>-the article title should be revised, like Standardization for the formulation of EPNs as a preservative technology for field application or something else</p> <p>-the abstract is not coherent and comprehensive. It needs rewriting.</p> <p>-the manuscript is written poorly. The structures of some sentences are grammatically wrong. The article language should be improved.</p> <p>Some information listed in the introduction part needs reference. Eg EPNs formulated and applied as insect cadavers showed higher efficacy for pest control than the EPNs applied in an aqueous solution</p>	
<p>Minor REVISION comments</p> <p>1. Is the language/English quality of the article suitable for scholarly communications?</p>	<p>The article's language should be improved again. The quality of the paper is written in a futile way and it is not suitable for readers.</p>	
<p>Optional/General comments</p>	<p>Major revision</p>	

Comment [zg1]: Author should support this with reference
